B.Tech, Electronics and Communication Engineering
Address : A226, Urbanrise Jubilee Residency, Nellikuppam road

Summary

An electronics and technology enthusiast with strong interests in electrical systems, automobile electronics, embedded systems, and applied artificial intelligence. Experienced in developing practical engineering solutions that integrate hardware and software, with a focus on intelligent systems, edge computing, and real-world applications. Driven by continuous learning and hands-on project experience in embedded platforms, sensor-based designs, and Edge AI, with a keen interest in automotive and electrical innovation. Adaptable, detail-oriented, and motivated to contribute to technology-driven engineering teams.

Education

SRM IST-Kattankulathur	2027
B.Tech · Electronics and Communication Engineering	CGPA - 7.9/10
Computer Software College (CSC)	Jul 2022 - Jul 2023
Honours Diploma in Computer Application (HDCA) · Hosur	Grade - A
Asian Christian High School	2023
Class XII - CBSE · Hosur	Percentage - 70.8%
Asian Christian High school	2021
Class X - CBSE · Hosur	Percentage - 78.8%

Experience

Ashok Leyland Ltd	Jun 2024
Implant Training	Hosur, Tamil Nadu
Completed in-plant training at a leading commercial vehicle manufacturing facility, gaining practical exposure to automotive systems, manufacturing operations, and industrial workflows. Developed an understanding of vehicle production processes, quality practices, and the role of electronics in modern automotive systems. Demonstrated keen interest, discipline, and adaptability while learning in a real-world automotive environment.	
Titan Company Ltd	Dec 2024
Internship · Research and Development Department	Hosur, Tamilnadu
Completed a short-term internship in the Research & Development department, gaining exposure to industrial engineering practices and product development workflows. Demonstrated strong commitment, adaptability, and a willingness to learn while working under technical guidance. Recognized for responsibility, enthusiasm, and effective execution of assigned tasks in a professional R&D environment.	
Mistral Solutions Pvt Ltd	Jun 2025
Internship	Chennai, Tamil Nadu
Embedded Design Intern at Mistral Solutions Pvt. Ltd., with hands-on exposure to industry-standard embedded system development practices and successful completion of assigned technical tasks.	

Projects

AI Virtual Mouse Using Hand Gesture	Apr 2025
· Python, OpenCV, MediaPipe,PyautoGUI, Numpy	
Designed an AI-based, touch-free virtual mouse system to improve accessibility and human-computer interaction through real-time hand gesture recognition. Implemented computer vision-based hand landmark detection using MediaPipe and OpenCV, enabling intuitive cursor control and mouse actions without physical input devices. Focused on smooth interaction, gesture accuracy, and usability to support hands-free computing, particularly for accessibility-driven applications.	

Anomaly Detection in Road CCTV Footage using Edge AI

Jul 2025 - Nov 2025

· Deep Learning in Visual Computing

Developed a real-time Edge AI-based road anomaly detection system using lightweight deep learning models optimized for deployment on Raspberry Pi Zero 2W. Implemented student-teacher knowledge distillation to achieve low-latency, on-device inference while preserving accuracy. Designed an efficient video preprocessing pipeline and integrated a Streamlit-based web interface for remote monitoring and control.

Certifications

Programming Test Series (C & Python)

Apr 2025

Sanfoundry · T20250529098

Programming Test Series II (C, Python, DSA)

Apr 2025

Sanfoundry · T20250530055

NPTEL · NPTEL26EE44S1057600187

Skills

Programming Languages: C language, Python, HTML, CSS, Verilog HDL

Languages and Frameworks: Numpy, Matplotlib, Pandas

Design and Simulation Tools: Auto CAD, LT spice, Xilinx, Modelsim

Hardware Skills: Arduino, ESP 32, Raspberry pi

Languages

English [Professional Working Proficiency], Tamil [Native Proficiency], Hindi [Limited Working Proficiency], Japanese [Fundamental Proficiency]
